Warranty

We hereby confirm that:

Our root protection screen RootBarrier® is based on a Xavan® nonwoven by DuPont with a PP coating.

When professionally installed, RootBarrier® comes with a 25-year warranty against root penetration as indicated in the table below:

RootBarrier® 325	Trees and shrubs except for aggressive roots, such as bamboo and reeds
RootBarrier® 360	Trees and shrubs except for aggressive roots, such as bamboo and reeds
RootBarrier® 420 UV	Trees and shrubs, including bamboo and reeds

RootBarrier® B.V. guarantees the UV-resistance of RootBarrier® 420 UV for a minimum of 5 years.

Professional installation implies (among other things):

- that the product is shielded from direct sunlight, RootBarrier® 325 and RootBarrier® 360 are UV-proof for no more than 3 months
- that the coating is not damaged during installation;
- that creasing is prevented, during and after installation;
- that a tree expert is consulted, if there is any uncertainty about the installation or the surroundings;
- that the tree(s) or plant(s) are given enough space to grow in.

Only damage claims accompanied by the original invoice can be considered.
